

GPS Tracking.

Fleet vehicles & asset management.

Invest in the future of your company.

Improving efficiency is the best way to increase profit in any business.

Vehicle Tracking is the best way to improve the efficiency of your fleet.

Increase your company's profit by decreasing your vehicle's operating costs.

Maximise vehicle productivity and reduce vehicle downtime.

Provide your customers with **World Class** customer service.

"Snitch Inc is an innovative supplier who has gone the extra mile to improve our business. In an increasingly competitive market place they are providing us with a competitive advantage and significant operational efficiencies."

Neil Wilson
Messenger Services Ltd

"Having ArmadaGPS in our 27 service vehicles has enabled us to direct incoming jobs to the nearest technician in any given area, thus making the Field Service Department more productive. ArmadaGPS also reduced our costs both on vehicle wear and tear and mileage."

Michelle Candler
Auckland Dispatch Supervisor

VISIBILITY

View the current location of your vehicles on easy to read maps. Instantly view the vehicle status including ignition on or off, idle or moving. View the vehicle history to ensure efficient routes are taken, and speeds and driving information to monitor driving style.

REPORTING

Generate clear and precise reports on your vehicles activities, from Stops and Mileage reports to Time on Site. Also run reports to show when registration and warrant of fitness are due. Print these in PDF or download them in CSV to view with Excel.

EASE OF USE

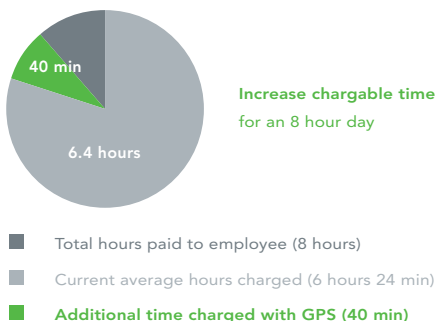

Armada GPS is extremely user friendly, and easy to use. With no additional software to install, Armada GPS can be used from any internet ready computer. Clear maps and easy to read reports make the information easy to understand.

EXTRA WORK

If an employee has a charge out rate of **\$60.00 per hour for an 8 hour day**, and work at **80% efficiency** they have achieved **6.4 chargeable hours**.

If through improved visibility, GPS tracking achieves a 10% improvement through the ability to complete more jobs, that's an extra 40 chargeable minutes per day.

THAT'S AN INCREASE OF \$40.00 PER DAY, OR \$9,400.00 PER YEAR.

LOWER MILEAGE

Reducing the distance travelled is the most effective way to reduce direct vehicle costs.

If it costs **\$0.50 per kilometre** to run a vehicle, and you achieve a reduction of **100 kilometres in a week...**

THAT'S A SAVING OF \$50.00 PER WEEK, OR \$2,350.00 PER YEAR.

That's two simple examples of how Armada GPS can save or make you money. Other examples could include lower vehicle maintenance costs as a result of monitoring driver behaviour, lower insurance premiums and increased business due to more satisfied customers.

Vehicle tracking will also increase your staff performance, job security and safety.

PACKED WITH FEATURES

- ✓ Web Based solution, using standard web browser
- ✓ No additional software to install
- ✓ True Path Tracking
Next Generation vehicle tracking
- ✓ Vehicle History displayed on map
- ✓ Activity Reports in .pdf or .csv
