The ibright® eRUC system is designed for New Zealand market conditions, allowing owner drivers and fleet owners an end-to-end solution that adds to the already high return on investment ibright® technology offers. The ibright® eRUC system includes:

- An MOT approved electronic hubodometer (electronic distance recorder)
- An independently audited and approved secure payment gateway
- An eRUC portal via ibright® Enterprise for manual and automatic RUC purchasing and management
- Compatibility with the ibright® CHECK-MATE unit for maximum on-road safety and driver convenience

Reduce costs and save money with the ibright® eRUC system:

- Do away with unreliable hubodometers - the ibright® eRUC system is all electronic
- Lower your RUC administration costs - we are an approved online NZTA RUC agent
- Maximise your off-road claims (ibright® eRUC leads the industry in off-road claims), meaning more money in your pocket
- Reduce or eliminate non-compliance fines - automated RUC claims means we get audited, not you
- Reduce working capital requirements
- Improve your management control through paperless RUC management, increasing your buying efficiency
- Future-proof your licence management system from legislation changes
