

## High Quality Vehicle Video Systems

# Viewtech 7" Digital Wireless Forklift Camera System with Video recorder

### View up to Four wireless cameras and features a built in digital video recorder.

The new Viewtech 7" Digital wireless kit solves many of the problems experienced when using older wireless system around heavy duty machinery. The system uses a special frequency hopping digital encoding technique to avoid interference and maintain a clear image at all times. Our new system is virtually realtime with no delay as experienced on older wireless systems and features a built in digital recorder.

#### Features

- monitor can accept up to four cameras and display in quad mode simultaneously
- built in digital recorder for event playback and training
- recorder memory auto overwrites
- time and date stamping
- low 100ms transmission time and up to 100m range (further with additional panel antenna)
- IP69K rated camera (can be pressure washed)
- Hi resolution digital monitor with superior brightness - 400cd/m2 brightest on the market
- Hi resolution CCD colour camera with infrared night vision and audio
- 160° wide camera viewing angle
- electrical trigger inputs for split, quad and single camera views
- 10V-32V dynamic voltage input range on monitor and camera
- versatile mounting options for both camera and monitor
- monitor button lights automatically illuminate in the dark

#### DVR Advantages

- review events, accidents and near misses
- replay for training
- improved operator awareness
- procedure reviewing

VT7WQDVR

#### Applications

- agriculture
- heavy transport
- forklifts & telehandlers
- cranes
- remote monitoring applications

#### Included Accessories

- monitor & loom
- Flexible dash/windscreen mount
- U-bracket (as shown on the right)
- remote control
- removable sun visor

Both camera and monitor can operate on 10V-36V DC.

Playback & DVR

The DVR system creates standard AVI files which can be played back on any PC or MAC. Files are time and date stamped and can be easily shared, copied and emailed. The system can accept up to 128GB micro sd cards and once full it simply starts to overwrite itself. You will always have a rolling period of time which can be reviewed. (see record times below)

Accessories

Contourable dash/  
windshield mount  
included

Clamp Mount  
(optional)

Overhead Bracket  
(optional)

Magnetic Camera Base  
(optional)

12dBi Directional  
range booster.  
Comes with 2m RF  
lead.

18dBi Directional  
range booster.  
Comes with 2m RF  
lead.

Wireless Range

The Viewtech monitor comes with two di-pole style antennas in order to maximise signal quality and range. In some situations directional signalling may be required. In these situations additional antennas can be added to the system. These comes with leads so that the antenna can be mounted outside the cab etc.

Record Times

Mode / Card Size	8GB	16GB	32GB	64GB	128GB
Single 640 x 480	14h	28h	55h	110h	220h
Quad 320 x 240 (x4)	11h	22h	43h	86h	172h
Split 400 x 480 (x2)	13h	25h	50h	101h	201h

Additional cameras are ordered seperately part VT671DW.
