

High Quality Vehicle Video Systems

Viewtech Mirror Style Reversing Camera Kit

The Viewtech VT42MRK enables reversing safety without any compromise

Part VT42MRK

Once installed you will never know its there until you select reverse. Super high quality two way mirror glass allows the mirror to function exactly as your factory mirror but when reverse is selected a high quality rear image will appear on the built in LCD.

The LCD is 100% invisible until it is activated.

Judge distance with ease. This system features a wide angled camera that will allow you to judge distance from objects up to the back of your vehicle as well as view back down your driveway. A built in large 4.2" LCD allows easy viewing and good brightness.

Applications

- domestic vehicles
- 4WD & SUV
- utes
- vans

Features

- Completely automatic - will activated in 0.5 seconds of selecting reverse
- exceptional build quality
- high quality two way mirror glass
- 4.2" Digital LCD colour display
- second auxilliary input (activated by the single button)
- discreet wide angle colour camera

Included in kit

- monitor, camera and 7m camera cable
- Mounting hardware
- cable loom with fuse box
- installation guide

The mirror/monitor is available on its own and will work with most existing reversing cameras.

The included mount will fit most Mazda, Fords & Toyota and a full mirror mounting kit is included for any vehicle.

Actual screen shot showing tow ball as well as completely horizontal view. The person (2 y/o) was not visible in the mirror itself.

Image showing camera installed near the boot release area. Camera was offset due to numberplate light location.
