

XRS™ *CONNECT*
SMART / ADAPTABLE / RUGGED

THE XRS RANGE

A New Era In UHF CB Radio

XRS™ Connect is an Australian Made radio platform designed to be smart, adaptable, and rugged.

These radios feature a professional grade speaker microphone complete with a powerful 2-watt speaker, customisable buttons and a high contrast OLED screen guaranteeing a crystal clear, anti-glare display.

Enabled by Bluetooth® wireless technology, XRS™ Connect is the clear market leader of connected UHF CB radios, with a number of unique features.

The XRS™ Connect range are the first ever UHF CB radios with app control, introducing new features such as creating and sharing scan lists, and instant access to the entire Australian and New Zealand commercial analogue frequency database.

As with many other smart devices, XRS™ Connect products are software upgradable via the app, keeping your radio up to date with the latest features and technology.

XRS™ CONNECT

ACTIVE MUTE

XRS™ Connect Active Mute allows users to manually mute the radio when receiving a phone call to their mobile phone. The XRS™ Connect App is able to detect incoming phone calls and automatically mute the XRS™ Connect radio for the duration of the call, ensuring uninterrupted phone conversations.

XRS™ Connect Active Mute uses smart phone and Bluetooth technology to either mute or lower the XRS™ Connect radio volume automatically when the user makes or receives a phone call. This allows the user to focus on their conversation rather than manually adjusting the volume on the XRS™ Connect radio.

XRS™ Connect Smartphone App

The XRS™ Connect App for Android and iOS offers a number of additional features, exclusive to the XRS™ Connect range of radios.

The XRS™ Connect App allows users to easily manage settings, download firmware updates, create custom scan lists, and track the GPS location of other XRS™ users through the use of XRS™ Location Services technology.

Users are also able to send, receive and display a short text 'status' on the tail of transmissions, selecting from either pre-defined or user-defined statuses.

The XRS™ Connect App also features offline map caching, giving users the option to download and store detailed topographic maps - ensuring accurate map display in areas with no cellular coverage.

XRS™ CONNECT

VOICE PLAYBACK

XRS™ Connect Voice Playback, enables users to record all voice transmissions received from other radios. Ideal for noisy cabins or for users who are in and out of their vehicles, this feature makes missing transmissions an issue of the past.

XRS™ Connect Voice Playback records and stores the first 30 seconds of each received transmission, with a total recording time of 12 minutes. This exciting feature is available in every XRS™ Connect model through the XRS™ Connect App.

XRS-330C

The XRS-330C is a super compact hideaway UHF CB Radio. The XRS-330C features a robust chassis with ABS construction and a drop-in style microphone mount. Due to its extremely small size the XRS-330C is the ideal option for modern 4WD vehicles with limited space to mount a radio.

XRS-330CP

The XRS-330CP portable pack comes with everything you need to get started – the XRS-330C UHF CB Radio, suction cup mount, 12V Accessory lead, 2.1dBi magnetic antenna and all mounting hardware. Contained within a handy carry case for convenient storage when the radio is not in use.

XRS-330CTP

The XRS™ Connect Touring Pack pairs the popular XRS-330C super compact UHF CB Radio, with the AE4018BK1 elevated-feed antenna, making this pack the obvious choice for those setting up their 4WD tourer.

XRS-330COB

The XRS™ Connect Outback Pack pairs the popular XRS-330C super compact UHF CB Radio, with the AE4707B medium-duty radome antenna, making this pack an excellent choice for those with a passion for outback touring.

XRS-370C

The XRS-370C is a compact hideaway UHF CB Radio. With a diecast metal chassis, in-built speaker and magnetic microphone mount the XRS-370C is the ideal radio for noisy cabins and reliable performance in tough conditions.

XRS-370C4P

The XRS™ Connect 4WD Pack pairs the XRS-370C Compact UHF CB Radio, with the Heavy Duty AE4704B radome antenna, the perfect solution for those users looking for the ultimate communications setup for their hardcore 4WD.

XRS-390C

The XRS-390C is the first UHF CB Radio to feature a built-in GPS receiver, offering true location awareness without relying on a smartphone to provide GPS location data. Combined with a rugged IP67 Ingress Protection rating, the XRS-390C is the perfect choice for use in UTVs and Agricultural machinery.
