

New Product Release

Limited Edition Coloured AE4700 Series

7th October 2020

GME is excited to announce that we will be running a limited-edition range of our AE4700 series antennas. Available from October 6th our most popular models, the AE4704 and AE4705, will be available in three new colour combinations of tan and black, white and black and to continue our support of the McGrath Foundation, pink and black.

The tan and black is the perfect addition to any Sandy Taupe Landcruiser while the white and black combination suits the vast number of white vehicles with black bull bars on our roads. To continue our support of the McGrath Foundation, 10% of all sales of the McGrath pink and black combination goes directly to help fund McGrath Breast Care Nurses in communities right across Australia

The AE4700 series is an adaptable antenna system with the coaxial termination embedded within the spring assembly with an easy screw down fitment of the whip. This allows for interchangeability of whips depending on the operating conditions and application, shorter lengths with lower gain for hilly terrain and longer lengths with higher gain for travelling on open roads with flat terrain. These antennas are a popular choice for 4WD enthusiasts hitting tough tracks or rugged touring.

All three colour combinations are available as either a complete antenna, whip or a twin pack for the ultimate package option. Limited quantities available.
