# Intelligently Connecting People

## Designed to help you take care of your communication.

Born out of the desire to provide an alternative nationwide communications network serviced and supplied by regional operators who know their customers, Trilogy Networks provides better connectivity with Digital Mobile Radio (DMR), provides flexibility to make one-to-one calls and communicate instantly with an entire work group at the touch of a button.

Designed to offer your business a scalable solution from small work teams to large enterprise customers who require Two Way Radio coverage in more regions across New Zealand. We will ensure your solution is designed and delivered based on your specific requirements. With Trilogy Networks your business can now integrate services such as GPS tracking, text messaging, lone worker, man down, voice recording and full voice dispatch solutions across the two way radio fleet.

## Capacity

Digital trunking allows dynamic access to the available two-way radio network capacity and utilises the available capacity. Calls are connected without long key up times. If additional coverage is required we can add capacity to suit.

## Control

With Trilogy you have better control and visibility into your business communications and ensure staff are connected instantly via the power of group calling.

## Configuration

Design and implement a solution that enhances the way your business operates. Our customer solutions are customisable and dynamic to suit your needs.
